

Homework 09 – Unit Test

1. Each member choose important units (i.e. classes in OOP) for least 2 assigned use cases.
2. Design test cases for those units, write a report to describe adopted techniques and description of test cases and test data.
3. Write codes for test cases (automatically) using a library (E.g. JUnit for Java, CUnit for C++)
4. Write a unit test report to present and summarize the results.
