

Homework 07 – Refinement of Data modeling

Refine the data modeling for your Project as followings:

1. E-R modeling
 - a. Map from entity classes to entities
 - b. Map from relationship between classes to relations
 - c. Creat E-R diagram
2. Database design
 - a. Choose a DBMS and design the database based on the E-R diagram (it can be either relational or NoSQL)
 - b. Make the detail design for all elements in the database (e.g. tables in relational DB or documents in NoSQL DB)
